LinkedIn | GitHub (Vue 3, Nuxt, React/Node projects)

SUMMARY

Front End Developer with 2+ years building scalable, component-based web applications with Vue.js (Vue 3), Nuxt.js, and JavaScript (ES6+), plus hands-on React.js/Node.js project experience. Proven track record integrating REST APIs for real-time data (flight availability, pricing, PNR, shipment tracking) and delivering responsive, cross-browser UI with measurable performance gains (~30% load-time reduction). Comfortable in Agile/Scrum teams, translating UX requirements into pixel-accurate, accessible components, and collaborating closely with backend and QA teams to debug production issues. Actively expanding into TypeScript, contact-center (CCaaS) platforms, and AI-driven conversational interfaces.

TECHNICAL SKILLS

Frontend Frameworks: React.js (project), Vue.js (Vue 3), Nuxt.js, Vue Router

Languages: JavaScript (ES6+), HTML5, CSS3

State Management: Vuex, Pinia, Context API/Redux concepts (React project)

APIs & Real-Time Data: REST API Integration, Axios, JSON, Asynchronous Data Handling, WebSocket-ready data flows

UI & Design: Responsive UI, Cross-Browser Compatibility, Component-Based Architecture, Vuetify, Form Validation

PWA & Performance: Service Workers, Offline Caching, Performance Optimization, Load-Time Reduction

Tools & Version Control: Git, GitHub, VS Code, Chrome DevTools, Vite, Webpack

Testing & QA: Manual Functional Testing, Bug Verification, Cross-Browser Testing

Methodologies: Agile/Scrum, Independent End-to-End Feature Ownership

Backend Exposure: Node.js (basics), Express (personal project)

Domains: Flight Booking, Travel Tech, Logistics, B2B Portals, Fare APIs

WORK EXPERIENCE

Frontend Developer (Vue.js) — Atozerv India Pvt Ltd, Coimbatore *Apr 2024 – Present*

- Developed 20+ reusable, scalable UI components using Vue.js (Vue 3) with a component-based architecture, mirroring patterns used in modern React/Vue development.
- Integrated REST APIs for flight booking, pricing, and PNR systems, implementing real-time data updates for availability and fare information.
- Implemented responsive, cross-browser-compatible UI and optimized user flows across desktop and mobile devices.
- Improved application performance and reduced load time by ~30% through code and asset optimization.
- Collaborated cross-functionally with backend engineers to debug and resolve API and data-integration issues, in an Agile/Scrum environment.
- Handled asynchronous data handling and real-time UI updates for live pricing and booking status.
- Owned end-to-end feature delivery independently after the first 6 months, from requirements through deployment.

Major Live Projects

- Flight Booking Platform (Live): Built flight search, booking flow, and PNR pages with Vue.js; integrated real-time flight availability and fare APIs.
- Travel PWA: Delivered a mobile-optimized Progressive Web App with offline caching and service-worker-based performance improvements.
- Logistics Management Platform (Live): Built shipment-tracking UI, order-management screens, and dashboards with REST API integration and responsive design.

Junior Software Engineer – Trainee (Frontend Development) — Albega Solution Pvt Ltd, Coimbatore *May 2023 – Dec 2023*

- Built responsive UI using HTML, CSS, JavaScript, and Vue.js.
- Assisted in migrating legacy components to Vue.js, improving maintainability and cross-browser consistency.
- Performed manual functional testing and bug verification across UI components prior to release.

PERSONAL PROJECTS

Login/Register Authentication App (React.js + Node.js)
github.com/Lavanyarpdl/react-node-login-register

- Built a full-stack authentication system using React.js and Node.js, implementing login/registration flow, form validation, and REST API integration between frontend and backend.
- Applied React component patterns and state handling, directly relevant to React-based frontend development roles.
